PROFESSIONAL SUMMARY

Entry-level Production Engineer with hands-on experience supporting high-volume manufacturing, process improvement, and quality initiatives in automotive components production. Skilled in root cause analysis, standard work, line balancing, Lean manufacturing, and data-driven problem solving, with demonstrated results improving throughput, reducing scrap, and strengthening operator safety.

EXPERIENCE

Manufacturing Engineer Intern | Ohio Precision Components | May 2024 - August 2024

Supported production engineering for three CNC machining cells producing 1,200+ aluminum components per shift.

Analyzed downtime and cycle-time data using Excel and Power BI, identifying bottlenecks that enabled a 9% throughput improvement.

Updated standard work instructions, visual controls, and setup checklists, reducing average changeover time by 14%.

Partnered with quality and maintenance teams on root cause investigations that reduced recurring dimensional defects by 18%.

Process Improvement Co-op | MidWest Appliance Systems | January 2023 - December 2023

Conducted time studies and line-balance analysis across a 45-person assembly area, helping eliminate 11 hours of weekly overtime.

Applied 5S, Pareto analysis, and fishbone diagrams to improve workstation organization and reduce material-search time by 22%.

Engineering Lab Assistant | The Ohio State University | August 2022 - December 2022

Supported student projects involving manufacturing process planning, CNC machining, metrology, and statistical process control.

Maintained laboratory equipment and assisted with safety training for 30+ students per semester.

EDUCATION

Bachelor of Science in Industrial and Systems Engineering | The Ohio State University | Columbus, OH | May 2024

Relevant coursework: Manufacturing Processes, Operations Research, Quality Engineering, Engineering Statistics, Facilities Design

SKILLS

Manufacturing: Lean manufacturing, continuous improvement, standard work, line balancing, 5S, value stream mapping, production planning

Quality: Root cause analysis, 8D, CAPA, SPC, FMEA, Pareto analysis, fishbone diagrams, dimensional inspection

Technical: Microsoft Excel, Power BI, Minitab, AutoCAD, SolidWorks, SQL, Python

Operations: Cycle-time studies, capacity analysis, work instructions, BOM review, ECO support, cross-functional collaboration

Certifications: Lean Six Sigma Yellow Belt, OSHA 10-Hour General Industry
